A NEW LABOR ORDER.

A New One Starting in Chicago That May Tie Up the Pair, CHICAGO, Nov. 29 .- Of certain plans now in process of development on be successfully carried into execution next spring will see one of the greatest strikes ever experienced in if not excee ing anything in the history of the country. There is now in process of formation what is to be known as the United Building Trades Council. It will comprise, according to the designs of the projectors. all artisans employed in any capacity in the construction of buildings. The carpenters cornice makers, architectural iron workers. plasterers, plumbers, gas fitters, painters, and eash and door and blind makers have already signified their willingness to join the amalga

mated organization. The idea originated with the leaders of the Carpenters' Council. In their contests with the employees during the passing year they learned the necessity of solidarity, of organigation among the building trades, in order to insure success in any effort to compel an advance in wages. Many meetings of delegates vance in wages. Many meetings of delegates from the various building trades unions have already been held, and the preliminary work of organization is well under way. The cardinal principle of the association will be a piedic by each member to refuse to work on any job with any artisan of the craft embraced in the council who is not a member of the Union. The adoption of this principle will make it impossible for the bosses to use one trade union for the purpose of defeating another which is on strike. It is also proposed to affiliate the new organization with the American Federation of Labor, thus securing the moral and financial support of a great labor organization.

The Bricklayers Union holds the key to the situation. Thus far they have refused to enter the amaignation. Their local union has proved itself invincible in the struugle with the bosses. The leadors and many of the rank and file are not in favor of an alliance with organizations which, like the Carpenters' Council, have not shown that they can fight their battles by themselves and win, as did the bricklayers. While the brick layers hold aloof the contolidation of the other trades will be weak in a vital part. The bricklayers insist that before they piedge themselves not to work with non-union carpenters, the Carpenters' Council shall give them substantial security that they shall suffer no loss by doing so. They want a guarantee for the payment of full wages to every bricklayer who may quit work because a non-union carpenter may be hired on the same job. So far this assurance has not been forthcoming in the shape in which the bricklayers wish it. from the various building trades unions have layers wish it.

Should the Amagamated association be perfected, the carpenters will in the spring renew their demands on the bosses, and should they be refused, the building business—including the World's Fair operations—will not be partially suspended only, but will come to a complete standatill.

FIRE AT YALE COLLEGE.

The Old South Middle Darmitory on the Campus Gutted Last Night,

NEW HAVEN, Nov. 29 .- The old "south middie" dormitory, the most ancient of the build-ings in the old brick row on the Yale campus, in rooms in the north entry, on the top floor, and was occasioned either by the bursting of a kerosene lamp or sparks snapping from an open fireplace. The room in which the fire started was not occupied at the time. Two students crossing the campus discovered the started the cry of "Fire." Instead of sounding the sharm, they began to carry things from the turning building, and it was not until sen minutes after the fire was discovered that the alarm sounded. In the mean time the fiames bursting from all of the windows. After the arrival of the fire department the fire was quickly under control, but not before the hulding had been completely drenched with water. water.
South Middle is the oldest building on the campus having been creeted in 1750. If had been recently remodelled, and was considered one of the most desirable dormitories on the campus. For years it was given up entirely to the suphomores, but in 1885, owing to some class disturbances, the sophs were barred from the building. Since that time it has sheltered members of all classes, the upper fluors being occupied exclusively by freshmen. The loss by the fire is chiefly from goods and furniture which belonged to students. The building itself was considered valueless, and would have been removed in a few years.

DR. M.PECK ARRESTED.

A Physician Implicated in a Tragedy Whereby Two Persons Lost Their Lives, GUTHRIE, O. T.. Nov. 20.-In the McPeck-West case to-day Dr. McPeck, a heretofore respected physician living at Mulhall, and a brother of the supposed double murderer of H. McPeck, was arrested, charged with com-plicity in the work by which two lives have heen taken and much controversy occasioned.

Many of Dr. McPeck's friends seemed resdy to interfere. He was brought here and released on bond. The poison which was administered to May Balley some days since. and from the effects of which she died, is alleged to have been given to her by Dr. Mc-l'œck, and as he was the first person to see George West; whose body was found on the road with the head beaten to a pulp, suspision points strongly toward him as being at least an accessory. The trouble is the result of a petty quarrel

over a comparatively valueless nuarier section of land. The mother of the McPeck brothers is in her 84th year, and is nearly crazed by the condition of things. The trial of Dr. McPeck is set for early in December.
